

CHAIN BUSHES FOR INDUSTRIAL APPLICATIONS

Prod. Group No. 6999

Chain Bushes

- maintenance-free components for conveyors

Advantages:

- high surface quality
- close dimensional tolerances
- excellent cost-effectiveness
- high durability
- materials: ferrous + stainless
- martensitic microstructure
- high hardness
- lubrication for the entire service life
- maintenance-free service
- special lubricants for improved resistance to galling

CHAIN BUSHES FOR INDUSTRIAL APPLICATIONS

Function:

- friction between bolt and bushes is minimized by design and material properties
- close dimensional tolerances and high surface quality
- maintenance-free hardened material

Design:

- small wall thickness
- powder metal material with definable density
- high wear resistance
- properties depending on application (industrial or automotive)
