

GKN MIRROR BUTTONS

Prod. Group No. 5100

Mirror buttons of varying designs, materials and including adaptable adhesive areas

- More than 100 different types of mirror buttons available
(order catalog at www.gknsintermetals.com)
- Various coatings available
- Optional 3M adhesive tape or similar
- Tool-formed undercut technology
- Complex geometrical features without costly secondary operations
- Available materials include ferrous alloys and stainless steel

GKN MIRROR BUTTONS

Typical thermal expansion coefficients

- PM $10 \times 10^{-6} \text{ K}^{-1}$
- Glass $8 - 10 \times 10^{-6} \text{ K}^{-1}$
- ZnAl casting $27,4 \times 10^{-6} \text{ K}^{-1}$

Advantages:

- Vibration-free installation
- Can be installed within the wiper area
- Thermal expansion coefficient similar to glass
- Can be glued using various bonding systems (e.g. PUR, PVB etc.)
