

GKN SENSOR RINGS

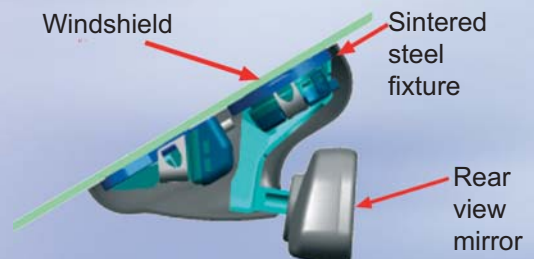

Prod. Group No. 5100

Rain sensor rings in different versions with various surface coatings and adhesives

- More than 100 different rain sensor rings and mirror plates are available (order catalog at www.gknsintermetals.com)
- Various surface coatings are available
- Optional adhesives can be offered
- High strength when using self-arresting steel springs on the mirror foot
- Undercut technology can reduce or eliminate costly machining operations
- Tool-given features offer close tolerances and are statistically repeatable
- Suitable to various adhesive systems for installation
- Used for application of rain - or light sensors

GKN SENSOR RINGS

Typical thermal expansion coefficients

- PM $10 \times 10^{-6} \text{ K}^{-1}$
- Glass $8 - 10 \times 10^{-6} \text{ K}^{-1}$
- ZnAl casting $27,4 \times 10^{-6} \text{ K}^{-1}$

NEW!!!

Camera fixtures for rear-view camera systems

- Vibration-free fixture
- Can be within wiper area
- Thermal expansion coefficient similar to glass
- Can be glued with various bonding systems (e. g. PUR, PVB etc.)
